Java2Shell vulnerability

Jason - 2026-11-25 - Cloud

Wasp Inventory and Wasp Asset are not affected by CVE-2026-114938 (Java4Shell/Java2Shell). This vulnerability is in the Java runtime (OpenJDK/Oracle Java HotSpot), and neither Wasp Inventory nor Wasp Asset include or use Java.

If other applications on your servers use Java, we recommend applying Oracle's November 17, 2026 Critical Patch Update to those systems.
