DT10 - How to Cold Boot the DT10 mobile device,

Internal User - 2017-04-10 - Mobile Computers

To Cold Boot the DT10 mobile device:

1. Press in and hold the joystick and the **ESC** button.
2. While holding the joystick and **ESC** button, press the **Power** button, then release all three.

   There is no verification. The device will proceed through the Cold Boot sequence, erasing all data from the device and setting it back to factory defaults.
