

WASP PROTECT

Portal > Knowledgebase > Software > MobileAsset > Error at login: The server principal "AssetUser" (or InventoryUser) is not able to access the database "WaspTrackAsset" (or WaspTrackInventory) Under the current security context.

Error at login: The server principal "AssetUser" (or InventoryUser) is not able to access the database "WaspTrackAsset" (or WaspTrackInventory) Under the current security context.

Scott Kircher - 2018-04-04 - in MobileAsset

try to log into MobileAsset client:

Login Error

AssetUser account is not setup properly to access one of the MobileAsset databases.

Wasp.DataAccess.WtDbException: Error executing sql statement --->

System.Data.SqlClient.SqlException: The server principal "AssetUser" is not able to access the database "WaspTrackAsset" under the current security context.

try to log into InventoryControl client:

Database was not found. The database needed for this application is either not running or not exist in server SERVERNAME\WaspDBExpress.

The server principal "InventoryUser" is not able to access the database "WaspTrackInventory" under the current security context.

OK

resolution: run CreateWaspAccounts SQL script
