Fontware - Installation Error: Macros are not enabled. How do I fix this so that FontWare and the add-ins install?

Scott Leonard - 2017-04-10 - in Discontinued Products

For Microsoft Word and Excel, the Macro security level must be set to medium or low for FontWare to install the add-ins properly. To change the security level of the Macros:

1. Open Microsoft Word/Excel.
2. Click on Tools and go to Macros, then Security.
3. Change the security setting to Medium or Low.

After Macro security settings have been corrected, install FontWare.
