MobileAsset: How to Restore the Database from MDF and LDF Files

Nathaniel Summers - 2023-01-19 - in FAQs

Issue: In most cases, one should use the Backup, Move, and Restore procedure found in the following:

https://support.waspbarcode.com/kb/articles/154

In instances where a backup cannot be made the following method may allow you to restore using the MDF and LDF data files.

1. Locate the Original MDF and LDF files

The location of your database files should be located in: C:\Program Files (x86)\Microsoft SQL Server\MSSQL11.WASPDBEXPRESS\MSSQL\DATA\ The exact location may be different depending upon your version of SQL and/or operating system You're looking specifically for the following files: WaspTrackAsset.mdf WaspTrackAsset_log.ldf

Copy these files to the new PC

2. Install MobileAsset on the New MachineFully install MobileAsset on the new machineBe sure to select Database, Service, and Client tools during the installationWe should be able to open MobileAsset to see a blank slate when completed

3. Stop the Services

On the PC where new database is to reside, open your services list: Click Start > Run (or Windows Key + R) to open the **Run Dialog**

Type **Services.msc** click **OK**

Find and stop the following services:

Wasp MobileAsset Windows Service SQL Server (WASPDBEXPRESS)

Rervices	ew Help						-		×
(= =) 💼 🖾	🗟 🗟 🖬 🕨 🖛 🛛 🕩

	Windows Audio Endpoint Builder Windows Backup Windows Backup Windows Rometric Service Ketneded / Standard /	Properties Help	ľ	ing	Automatic Manual Manual (Trig	Local Syste Local Syste Local Syste	_		

4. Copy out the current MDF and LDF files

In the following location:

C:\Program Files (x86)\Microsoft SQL Server\MSSQL11.WASPDBEXPRESS\MSSQL\DATA\

Copy the following files to a different location

WaspTrackAsset.mdf WaspTrackAsset_log.ldf

(This is so we have something to go back to if the restore is not successful)

Copy the Original MDF and LDF files over the new files
 Take the original MDF and LDF files, and copy them to the location of the new files.
 If prompted to replace the files, select **yes**

6. Start SQL Server (WASPDBEXPRESS) Service

The SQL Server (WASPDBEXPRESS) Service was previously stopped, start it again.

Do not start the other service yet.

7. Fix Restored Users

Log into SQL Server Management Studio using **SQL Authentication** and the following credentials

Username: sa

Password: Wasp\$07Wasp\$07

Click File menu > Open > File

Navigate to:

C:\Program Files (x86)\Wasp

Technologies\MobileAsset\Database\WaspDBInstaller\Upgrade\

And open the file

FixAssetUser.sql

With the WaspTrackAsset database selected in the dropdown, click **Execute**

8. Restart Wasp MobileAsset Windows Service

Services (Loca	Name WilletService WalletService	Description Provides W	Status	Startup Type Manual Manual	Log On As Local Syste Local Syste Local Service Local Syste		
	WaterService WarpJITSvc Wasp Inventory Windows Service	Hosts objec Provides a Jl Wasp Inven		Manual (Trig Automatic
