### MobileAsset: We have employees in the database, but List Employees is blank

Jason Whitmer - 2017-04-10 - in Version 7

**Symptom:** Employees are in the database, and may even show up on reports, but Lists > Employees is blank

**Cause:** This can happen when there is data missing from the Address table in the database.

**Resolution:** Download and extract

<http://dl.waspbarcode.com/wasp/supportfiles/MA7AddEmployeeAddress.zip> on the server machine, then run AddEmployeeAddress.bat.
