Multiple Products - Changed the printer's ribbon and now the barcodes are smudged with imprecise lines

Max Holden - 2017-04-10 - in Hardware

This applies to the WPL305 and WPL610

You want to adjust the print drivers darkness settings to about 5

In the print drivers print prefrences select the options tab at the top, then uncheck the use current printer settings and move the slide bar to somewhere around 5.
