QuickStore: Creating/Receiving a purchase order for a different store

Max Holden - 2017-06-22 - in [Software](#)

The settings allow creation, receiving and adjustment... for a store and for other stores at a store

When a PO is created, the Ship To location is the location that must logically receive the PO because that is where the goods have been shipped.

Also, when creating a PO, you indicate what store's stock is to be updated by the receipt... this is the Default Add Store (F8-Store)

The Ship To location is selected by F2-Store to Assign Ship To

If you have the goods shipped to store #1, but indicate that the store's stock to be update is store #2 - then store #1 will receive it and the stock counts for store #2 will be updated -

Adding Purchase Order (New) Store# 1

Date: 12/01/11 Sold To (PDSTX) Ship To

Vendor: PRE Uniforms USA
2100 Republic Drive
Dallas, TX 75081

Clerk: Clerk

Ship:

1. Items 2. More

Scan/Qty: F7-Lookup (Alt + F7 Search) Default Store - Store No. 2

T	Item No.	Item	Store	Qty	Rec	Stock	Oth PD	VStock	Cost	Total
	00106868	PRE	002	1					0.99	0.99
	00111830	PRE	002	1					2.75	2.75

Item Qty Ordered 2

Print notes on the vendor's purchase order Qty Open 2

Total \$3.74

ship to not specified
so ships to store that
ordered it

If you have goods shipped to store #2, but the Default Add Store is #1, then #2 must receive it, but it will add stock to #1 -

Adding Purchase Order (New) Store# 1

Date: 12/01/11 Sold To Ship To (Store No. 2) (PDSTX)

Vendor: PRE Uniforms USA
2100 Republic Drive
Dallas, TX 75081

Clerk: Clerk

Ship:

1. Items 2. More

Scan/Qty: F7-Lookup (Alt + F7 Search) Default Store - Store No. 1

T	Item No.	Item	Store	Qty	Rec	Stock	Oth PD	VStock	Cost	Total
	00106868	PRE	001	1		10			0.99	0.99
	00111830	PRE	001	1					2.75	2.75

Item Qty Ordered 2

Print notes on the vendor's purchase order Qty Open 2

Total \$3.74
