WaspTime Web v7: Edit interface hyperlink floats off to the side at far right of timesheet

Scott Leonard - 2023-07-25 - in Version 7

Problem

Using WaspTime Web, newer browsers cause an issue where the edit interface hyperlink floats off to the side at the far right of the timesheet.

Solution

Download and replace a CSS file (Cascading Style Sheet) on the WaspTime Web IIS server.

Procedure

1. On the IIS Server PC that hosts WaspTime Web, navigate to this path:
C:\Program Files (x86)\Wasp Technologies\WaspTime Web

2. Rename the file "WaspTime.css" to "WaspTime Original.css".
3. Download the following file into the same path.
<https://dl.waspbarcode.com/kb/wt/v7/WaspTimeCSS.zip>
4. Extract the Zip file, which contains a replacement WaspTime.css file.
5. In the web browser, reload the Timesheet page. The issue should no longer occur.
Note: You may need to clear the browser cache for the change to take effect.
