Daylight Savings Time Spring 2017

2017-03-10 - Internal User - 0 Comments - in General

Clocks settings Spring forward early March 12

The articles below can help you keep your WaspTime Time & Attendance software in sync for daylight savings time.

How do I apply daylight Savings Time

<http://support.waspbarcode.com/kb/articles/390>

Be sure the time on your Wasptime clock matches the time on the server with Time Sync Setup

Daylight Savings Time Note

Be aware that your time clocks will NOT automatically update with the correct time for Daylight Savings Time, even if the PC where the service is installed does automatically update. You must set up an alternate sync at the time of the change. Usually the time change occurs at 2:00am. If you have employees who will be working an overnight shift that spans 2:00am when the time changes, you will need to arrange to have someone change the time on the clocks by entering the correct time through Clock Setup.
