End of support for InventoryControl version 6

2014-04-16 - Internal User - in General

What does this end of support mean?

As of April 16, 2014 there will be no more updates, patches or technical support for InventoryControl v6. We encourage our customers to update to the current version InventoryControl v7. Customers updating to version 7 will benefit from an enhanced security module, the ability to mass update customers/ items and WaspLabeler v7.

How do I update to InventoryControl v7?

Visit our InventoryControl v7 web page http://www.waspbarcode.com/inventory-control/whats-new or speak with a sales agent in

our customer service department to get upgrade pricing and information about remote assisted install services (optional).

Which edition of InventoryControl is right for me?

The new Inventory Control v7 is available in 3 editions: Standard, RF Professional, and RF Enterprise. Update to the edition that best suits your business, and start enjoying the exciting new features available in Inventory Control v7. Comparison Chart
