Low Disc Space notices on Cloud services

2018-02-06 - Jason Whitmer - in General

Over the last few days, some users may have received Low disc space errors when running reports on AssetCloud and InventoryCloud. Due to load balancing, this only affected some users, and was intermittent. Disc maintenance has been performed this morning, so the error should no longer occur. Please contact support at 866-547-9277 option 3 if you are still experiencing issues.
