### 600 Thermal Printer - Is there a way of using the W-600 in a DOS environment?

Internal User - 2017-04-10 - in [Printers](#)

You are not able to send instructions to the W600 via DOS. You will need the W600Z model. This printer has a built in command language called ZPL. You can format printer instructions in the ZPL language and send them to the printer via the command prompt.
