AssetCloud & InventoryCloud: data encryption

Scott Leonard - 2023-02-17 - in FAQs

Data is encrypted in transit and at rest.

From the AWS page: "Advanced Encryption Standard (AES) with 256-bit keys (AES-256). It's the strongest industry-adopted and government-approved algorithm for encrypting data. AES-256 is the technology we use to encrypt data in AWS,"

=====

Question: Are the AssetCloud and InventoryCloud mobile apps GDPR compliant?

Answer: Yes. The database, username, and password are all encrypted on the mobile device, and the app is GDPR compliant.
