Web (hosted by Wasp)

Is Microsoft Azure Active Directory supported?

Is Multi-factor Authentication supported?

Currently (October 23, 2020) we support ADFS for connecting to an Azure Active Directory Federated Services server.

Microsoft's Active Directory Federated Services authenticates users on our behalf using configurable methods which can include Multi-Factor Authentication.

See

<https://docs.microsoft.com/en-us/windows-server/identity/ad-fs/operations/configure-additional-authentication-methods-for-ad-fs>

The upcoming software update will also include SAML 2.0.
