## **AssetCloud on mobile device: Can I see if an asset is checked out? no**

Scott Leonard - 2021-04-29 - [AssetCloud](#)

This is not included on mobile devices, by design. AssetCloud on mobile uses a cached database (not connected in real time to the full database) so there's no way the device can know whether it's checked out. This is not a feature request situation since it's by design.
