AssetCloud Report editing example: Show the number of assets on the Assets by Location Report

Scott Leonard - 2019-10-10 - in Cloud

This AssetCloud report editing example describes how to add the number of assets to the Assets by Location Report.

Start designing the report.

Click into the Insert tab.

Drag a Text object onto Section 4.

Type or copy/paste the following into the Expression box:

Count: {Count()}

Note: You can change the text outside of the curly brackets if you want it to say something else, for example:

Total Assets: {Count()}

Click OK.

Adjust the object's position if needed.

Click into the Preview tab.

Your count object should show on the report's last page.

Asset By Location Report - Count

Location IQS Warehouse : 1A

Asset Tag	Asset Type
VSC00003	10ft. PopUp Graphic Panels:
VSC00004	10ft. PopUp Graphic Panels:
VSC00005	10ft. PopUp Graphic Panels:
VSC00006	10ft. PopUp Graphic Panels:
VSC00007	10ft. PopUp Graphic Panels:
VSC00008	10ft. PopUp Graphic Panels:
VSC00009	10ft. PopUp Graphic Panels:
VSC00010	10ft. PopUp Graphic Panels:
VSC00011	10ft. PopUp Graphic Panels:
VSC00012	10ft. PopUp Graphic Panels:
VSC00013	10ft. PopUp Graphic Panels:
VSC00014	10ft. PopUp Graphic Panels:
VSC00015	10ft. PopUp Graphic Panels:
VSC00016	10ft. PopUp Graphic Panels:

Count: 111

File menu, Save.

Close the Report Designer tab of the browser.

The report can now be run with parameters.
