AssetCloud (web) changelog

Scott Leonard - 2023-10-16 - AssetCloud

On Saturday, October 21st, 2023 at 9:00 p.m. CST, Wasp Barcode Technologies will roll out improvements to our AssetCloud product.

In addition to bug fixes, you will find the following new features:

- A new **purchase order system for multi-quantity assets**. You will be able to create a purchase order, send it to vendors, and use our “receive” function when the order arrives. This is strictly for multi-quantity assets, allowing you to indicate the quantity ordered and the quantity received. You can use the “convert” feature after receiving the assets to convert them from multi-quantity assets to fixed assets if you need to track unique information about each one.

- A new **archived transaction grid**. We previously created an archive function for transactions to improve performance of our database and transaction history grid. If you perform a transaction archive, this grid will allow you to see all the archived transactions that no longer display on the transaction history grid.
