BarcodeMaker: How to create barcodes in Crystal Reports version 12

Scott Barnett - 2017-11-21 - in Software

When using Crystal Reports version 12, the BarcodeMaker provided UFL doesn't work out of the box.

Download and extract the linked file to C:\Program Files\Wasp Technologies\BarcodeMaker.
<http://dl.waspbarcode.com/wasp/supportfiles/kbimages/barcodemaker/cruflwasp.zip>

Click Start, Run, and enter this command, including the quotes:

```
regsvr32 "C:\Program Files\Wasp Technologies\BarcodeMaker\CRUFLWasp.ocx"
```

After that, the barcode functions will be available in the Visual Basic UFL section in the Additional Functions in Formula.
