## BarcodeMaker: The u2lwasp.dll functions are not appearing in Crystal Reports.

Scott Leonard - 2023-01-20 - [Software](#)

Download the linked file and extract it to C:\Program Files\Wasp Technologies\BarcodeMaker.  
<https://dl.waspbarcode.com/wasp/supportfiles/kbimages/barcodemaker/cruflwasp.zip>

Go to Start > Run, and enter this command:

```
regsvr32 "C:\Program Files\Wasp Technologies\BarcodeMaker\CRUFLWasp.ocx"
```

It should respond "DllRegisterServer in C:\Program Files\Wasp Technologies\BarcodeMaker\CRUFLWasp.ocx succeeded." The functions in Crystal will then be available under the Visual Basic UFL folder.

Some users have reported that after the above steps, they get a new error "File not found: bmxl32.dll" Should you receive this error, copy the bmxl32.dll file from C:\Program Files\Wasp Technologies\BarcodeMaker to c:\windows\system32 and c:\windows\crystal.
