Creating ODBC connections in 64-bit versions of Windows

Scott Leonard - 2017-04-10 - Software

*This article applies to InventoryControl and MobileAsset.

If you need to create an ODBC connection in a 64-bit Windows environment, rather than doing it through the control panel, you will need to navigate to C:\Windows\SysWOW64 and run odbcad32.exe, then add the connection as normal.
