DR6 - How to update the Android 12 build to the most recent

Jason Whitmer - 2024-04-03 - in Mobile Computers

The DR6 mobile device has a utility to apply updates for the Android Operating System. If your DR6 came with an RFID trigger (model RG768) and is having trouble connecting that device, this update should alleviate that issue.

Under Settings

open System

then System Update Center

It will check for an update, and if one is available it will present the details and a DOWNLOAD AND INSTALL button will appear:

New system update available

New system version: 20230721

Update size: 1854 MB

Description

[Full Update] Update to RAYA_V05.02.01_20230721 [MR2].

Current system version:

RAYA_V04.35b02_20221222

Security patch level: Nov 1, 2022

☒ Restarts automatically after installing updates

DOWNLOAD AND INSTALL

Tap that button to allow the download to commence. It will automatically restart the device once the process is completed.

Your system is up to date.

Current system version: RAYA_V05.02.01_20230721

Security patch level: Jul 1, 2023

Once complete, it should show RAYA_V05.02.01_20230721 (or higher version/later date)
