DR6 Standard gun grip setup

Scott Leonard - 2024-03-28 - in [Mobile Computers](#)

There's a Gun Grip quick start guide that is included in the package, with instructions for assembly.

remove the panel covering the contacts on the DR6

remove the bottom bumper from the DR6

insert the bottom of the DR6 into the gun grip and snap it into place.

The gun grip should just start working when the DR6 is on, no app or other configuration is necessary.
