Fontware - How to create a Code 39 barcode without the toolbar

Scott Barnett - 2017-04-10 - in Discontinued Products

1. In Microsoft Word type an *.
2. Type the string to be barcoded.
3. Type another *.
4. Highlight entire string (including asterisks) and change the font to the version of Code 39 desired. Set the font size to 20 or greater for optimal readability.
