Fontware - How to write an Excel macro to automate the creation of serial number barcodes without requiring the user to select the barcode font

Scott Barnett - 2017-04-10 - in Discontinued Products

You can write a formula for the cell and it will automatically create the barcode for you, in that cell. See example below. For more detail go into Help for Add-ins>Excel.

```
=WaspBarCode(val, sym, size, res, caploc, chkdgt, [frm])
```
