### HC1 mobile device: Encryption and EAP choices

Scott Leonard - 2018-05-03 - in Mobile Computers

What are the available encryption and EAP choices for Wifi on the HC1 mobile device?

There are two models of HC1 with slightly different internal components. To determine which one it is, open the battery lid, remove the battery, and look at the label to the right side. There is a model number ending in either ADG or MDG.

For more information, see the Summit documentation here:

[http://www.summitdata.com/Documents/Glossary/knowledge\\_center\\_e.html#encryption](http://www.summitdata.com/Documents/Glossary/knowledge_center_e.html#encryption)

MDG model Encryption: None WEP WEP EAP WPA-PSK WPA TKIP WPA CCKM WPA2-PSK WPA2 AES WPA2 CCKM WPA-PSK-AES WPA-AES WPA2-PSK-TKIP WPA2-TKIP	MDG model EAP Types: None LEAP EAP-FAST PEAP-MSCHAP PEAP-GTC EAP-TLS EAP-TTLS PEAP-TLS
ADG model Encryption: None WEP WEP EAP WPA-PSK WPA TKIP WPA CCKM WPA2-PSK WPA2 AES WPA2 CCKM	ADG model EAP Types: None LEAP EAP-FAST PEAP-MSCHAP PEAP-GTC EAP-TLS EAP-TTLS PEAP-TLS
