I need to allow a user with only user access run my Wasp software but I keep getting errors. It works fine as an administrator.

Sicaro - 2017-04-10 - Version 7

The user must have full control over the following two registry keys.

HKEY_LOCAL_MACHINE / SOFTWARE / MICROSOFT / MSSQLSERVER

HKEY_LOCAL_MACHINE / SOFTWARE / WASP TECHNOLOGIES

(for 64bit OS: HKEY_LOCAL_MACHINE / SOFTWARE / WOW6432NODE / WASP TECHNOLOGIES)

The user also needs read/write permission for the following folder:

C:\Program Files\Wasp Technologies

(for 64bit OS: c:\Program Files (x86) \Wasp Technologies
