InventoryControl: Blank Database for version 5

Max Holden - 2023-01-20 - in Software

Download and extract this file on the database server machine:

<https://dl.waspbarcode.com/wasp/SupportFiles/RestoreBlankDBIC5.zip>

If you have the Standard or Pro version of InventoryControl, run Restore.bat.

If you have Enterprise, you can restore InventoryControl60Blank.bkp in SQL Server Management Studio, but after restoring it you will need to also run CreateWaspAccounts.sql. Or you can edit RestoreDB4IC5.wql to correct the Server= line to your server\instance, and the Password= line to your SA password.

This backup is for InventoryControl v5.6.2. If you are running an older patch version of InventoryControl 5, please download and apply that patch from

https://dl.waspbarcode.com/wasp/SupportFiles/InventoryControl_Patch_562.exe
