InventoryControl: Error when trying to create mobile database: Could not load file or assembly 'System.Data.SqlServerCE...

Jason - 2019-09-16 - [Version 7](#)

When trying to create the mobile database, you may receive an error: "Could not load file or assembly 'System.Data.SqlServerCE, Version=3.5.1.0, Culture=neutral, PublicKeyToken=89845dcd8080cc91' or one of its dependencies'. The system could not find the file specified." This error means that SQL Server Compact Framework is either missing or corrupt.

To resolve this issue:

1. On the InventoryControl client PC where you're attempting to create the mobile database, browse the InventoryControl installation disc, and navigate to: **\PROG\Microsoft SQL Server Compact 3.5 sp1**.
2. Run **SSCERuntime-ENU-x86.msi**. If it gives the options to **Repair** or **Remove**, select **Repair**.
3. If the error persists, rerun the installer and select **Remove**, then run it again and select **Install**.
