InventoryControl - v5 Enterprise database upgrade scripts

Internal User - 2017-11-21 - in InventoryControl v5 and older

To manually upgrade an InventoryControl Enterprise database from any version 3.4 or newer to current, download this

file: <http://dl.waspbarcode.com/wasp/supportfiles/UpgradeDbIC561.zip>

Extract the file, then run the scripts in this order:

- File1=Upgrade34to37.sql
- File2=SetDbOptions.sql
- File3=DropTableConstraints.sql
- File4=UpgradeInventoryTables.sql
- File5=CreateTableConstraints.sql
- File6=CreateInventoryViews.sql
- File7=CreateInventoryStoreProc.sql
- File8=Install_ENGLISH_Inserts.sql
- File9=CreateWaspAccounts.sql

The scripts are current for version 5.6.1.
