Labeler - Error - When entering the number assigned to create an EAN8 barcode, I get a 32502 error message.

Internal User - 2017-04-10 - Wasptime Version 6
Create the barcode in Labeler and leave off the last character (it is a check digit and the number will be generated by labeler.)

Check that when the barcode is created, the last number looks the same.

Example:

In Labeler create an EAN barcode with the value 5005070.

Then look at the barcode, it should say 50050703 underneath it.
