Labeler: How to make labels that have serialized barcode values, with each individual serial number exactly four digits in length (0001, 0002, 0003, etc.)

Internal User - 2017-04-10 - [Version 7](#)

After selecting serialization as the source for the barcode object, click the Format button, then enter four zeroes in the format field:

0000

This will provide the leading zeroes you desire for values less than 1000.
