Labeler - Installation - Labeler installation will not accept the Serial # on the back of my WaspNest CD case.

Internal User - 2017-04-10 - Documentation

The serial number you have is for WaspNest. That installs Labeler at the same time it installs WaspTrack Asset and WaspTrack Inventory. It is not a Labeler only serial number. To install Labeler from that CD, using that Serial #, you will have to install the whole of WaspNest. Labeler can then be started independantly from your Start menu.
