# Labeler v7: How to link to a picture stored in a SQL data source

Scott Leonard - 2019-05-10 - Version 7

Note: This article was written for picture attachments in a SQL database.

1. In the Design tab, drag a picture object to the layout.
2. In the Open dialog, click Cancel.
3. With the picture object still selected, click the Content tab in the Properties pane.
4. Click the Database button.
5. Select the picture field from the popdown.
6. Done.
