MobileAsset - How can I remove all Assets from the database to start over

Jason Whitmer - 2017-04-10 - in [Mobile Asset v6](#)

The only ways to remove all of the existing assets to start fresh would be to either go to [Asset Management](#) > [Dispose](#), click [Custom Filter](#) and check the [Find All](#) box and click [Find](#), then [Select All](#), or export all of the other information you want to retain (site/location, asset types, customers, etc) then restore a blank database and import those exported tables.
