MobileAsset v6: I need to know how to add a Location field to the Asset Tag label.

Internal User - 2023-01-19 - in Mobile Asset v6

Note: This article applies to version 6 only. For version 7, see Related Articles below.

1. Within the External Data Source Wizard, on the Data Table Selection screen, add check marks for `dbo.asset` and `dbo.location`.
2. Click Next to get to the Data Link Creation screen. On the Data Link Creation screen, click Add Link. On the left, select table `dbo.asset` and column `location_id`. On the right side, select table `dbo.location` and column `location_id`. Click Add Link.
3. On the Data Link Creation screen, click Add Link again. On the left, select `dbo.asset` and

column asset_tag. On the right, select dbo.vLabelerAsset_AssetTag, and asset_tag. Click Add Link.

4. Click Next to get to the Data Column Selection screen. Under dbo.location, add a check mark for code. Click Exit Wizard.
