## MobileAsset v7: attempting full sync on mobile device: Error uploading chunk 0...

Scott Leonard - 2018-05-15 - [Mobile Computers](#)

### Symptoms

1. Attempting to do a full sync on a mobile device, the device displays an error similar to:  
Progress 3 of 3  
Uploading...  
Error uploading chunk 0, Sent=204800, Uploaded=0  
Could not find file 'C:\ProgramData\Wasp Barcode
2. MobileAsset.log from the device contains an error similar to:  
2015-05-28 10:05:50.767 VERBOSE | exception in DoUpload Could not find file 'C:\ProgramData\Wasp Barcode Technologies\MobileAssetWindowsService\7.0.0.0\App\_Data\Up635684043475785703.xml'.

### Cause

In the path from the error message, on the PC running the Wasp MobileAsset Windows Service, the App\_Data folder (from the full path above) is not present. The service cannot create the folder (even if it is set to log on as a Windows administrator).

### Resolution

1. If you are not showing hidden files and folders, enable that option.
2. Manually create the App\_Data folder. All folders in the full path should exist:  
C:\ProgramData\Wasp Barcode Technologies\MobileAssetWindowsService\7.0.0.0\App\_Data
3. The full sync should now complete.
