HOW TO APPLY THE PATCH:

MobileAsset Standard or Professional: On each client machine, run the patch program. The patch will bring the program to the latest version. On the database server, if ONLY the database is installed, there is no need to run the patch. The database is updated when any client machine is patched. However, if the program is also installed on the database server, run the patch program on the database server.

MobileAsset Enterprise DB Installer:

If you have Enterprise edition, please download the patch, as explained above in the Standard and Professional version, and also download the Enterprise DB Installer and run it on your database server.
