MobileAsset: Web Module Demo/Trial

Internal User - 2018-08-10 - in Version 7

Wasp is no longer selling licenses for MobileAsset Web. This article is maintained for archival purposes. Wasp offers a newer web-based product called AssetCloud that may meet your needs.

We do not offer a downloadable demo/trial for MobileAsset Web. If you wish to view the interface, you can log into our test database at <http://ma.waspbarcode.com>

For the username and password, use sales1, sales2, etc., filling in the same for both fields.

Note: The MobileAsset Web module is deprecated. It relies on Silverlight, which many

modern web browsers are blocking or not supporting (Google Chrome, Mozilla Firefox, Microsoft Edge). You may need to employ workarounds or specific browsers (Internet Explorer) to get the Web Module to work.
