Multiple products: Running installer or patch: "The installed version of the application could not be determined. The setup will now terminate."

Scott Leonard - 2017-04-10 - in FAQs

Cause

The logged-in Windows user is not a Windows administrator. Like most software, Wasp products should be installed by a Windows administrator.

Resolution

1. Log onto the PC as a Windows administrator to install the software.

or

2. Right-click the installer and choose Run As Administrator. Note: This may not always work.
