Multiple Scanners: Send only tracking number from FedEx and USPS barcodes

Scott Leonard - 2022-03-07 - in Scanners

The PDF linked below is a configuration document to program certain Wasp 2D scanners to send both FedEx and USPS tracking numbers (only) when scanning their barcodes (as of March 2022). These scanners should be able to read the configuration barcodes from a computer monitor, or the pages can be printed out. Scan all the barcodes top to bottom on all pages to complete the programming.

Configuration document:

https://dl.waspbarcode.com/kb/scanner/FedEx_%26_USPS_tracking.pdf

=====
=====

Tested successfully with WDI4200, WDI4600, WDI4700, WDI7500, WDI7500-02

Does NOT work with WWS650, WWS750

Details: Send only tracking numbers from barcodes:

FedEx Tracking (34 characters): skip 22 characters, send 12 characters

USPS Tracking (34 characters): skip 12 characters, send 22 characters (ignore AIM ID]C1 and <GS> character)
