PreciseTime: Interoperability with QuickBooks

Scott Leonard - 2024-06-13 - PreciseTime

The June 15, 2024 update to PreciseTime enables interoperability with QuickBooks.

1. For QuickBooks desktop, PreciseTime exports data in IIF file format, which QuickBooks desktop can import.

2. For QuickBooks Online, PreciseTime exports data in CSV format, which QuickBooks Online can import.
The default Export Type "CSV Exports" should contain all the fields required by QuickBooks.
