PreciseTime: When Departments are created without Department Names, the Department list parameter popdown in reports shows null

Scott Leonard - 2024-12-11 - PreciseTime

Situation:

One or more Departments are created, but they do not have Department Names specified, i.e. they are blank. (The Department Name field is not marked as required.)

Reports, Weekly Timecard, put cursor in Department paramater field, down arrow key, the popdown menu shows "null".
Note 1: null only shows one time in the popdown list, whether there is one Department without a name, or more than one.
Note 2: If a Department does have a Department Name and another does not, the popdown list will show the Department Name(s) along with "null".

Other reports have the same behavior in the Department parameter field: Payroll Summary, Punch History, etc.

This issue was observed in PreciseTime v01.01.00 @ 6/13/2024 (Build:2.2.3.30960)

Workaround:

In Setup, Departments, edit each Department, specify a Department Name, and Save.
