Printer driver and calibration steps for most Wasp Printers

Internal User - 2023-10-26 - in Manuals and Driver

Windows print driver for WPL Label Printers (see below for full list of models). This driver is compatible with 32-bit and 64-bit versions of Windows 11, 10, 8, 7, Vista, XP, and Windows Server 2003, 2008, 2012, 2016. 2019

Click on the link below or copy the link to your web browser:

<https://dl.waspbarcode.com/kb/printer/WaspPrintDriver2023.3.exe>

NOTE: If this is a new computer and you have McAfee Live Safe installed, pause real time scan for at least 15 minutes to install the printer as McAfee will block the installation process.

Installing the printer

1. Turn on the printer, wait for the status light to display green, then plug its USB cable into the PC. After Windows installs its USB Printing Support driver (seen in Devices and Printers under Unspecified), the printer is ready for driver installation.
2. Run the downloaded file, which extracts the drivers and runs the DriverWizard. You will see references to Seagull Scientific, Inc., which is normal. Follow the prompts to upgrade an older driver, or install a new driver.
3. If there is an older version of the driver installed, the DriverWizard can upgrade in place. Reboot the PC if prompted. After you log back in, it may prompt to reboot again; please do so. When you log in again, it should confirm removal of the old driver(s).

Calibrating the printer

After installing your printer it will need to be calibrated to the size of the labels. Follow the steps below to calibrate:

1. Download the Diag Tool from the link below then unzip the file:
https://dl.waspbarcode.com/kb/printer/DiagTool_v1.63.zip
2. Once you have unzipped the file, run the Diag Tool.

3. Click on the Get button in the bottom right corner. Don't worry about the information that populates the boxes. If you are calibrating a network printer, change the interface box to

Changing driver settings

Once it has been calibrated you will need to set your driver size.

1. Open the Control Panel on your computer. (Do not use Windows Settings as this does not allow you to change the printer's default settings.)

2. Find your printer and right click on the printer and choose Printer Properties (4th on the list)

3. Click on the Advanced tab at the top of the screen

4. Click on Printing Defaults at the bottom of the screen

5. The first tab is Page Setup. Stock, the default is 4" x 6" click on the drop down box to change your label size.

6. Once you have selected your label size click Apply, then OK. Click on the General tab and then click on Preferences.
