Product Sunsets & Policy

Beau Dixon - 2025-05-16 - Discontinued Products

Wasp Product Sunset Policy

In an ongoing effort to provide reliable high-quality products and services, Wasp Barcode Technologies periodically "Sunsets" (also known as retiring) older versions of our products, thereby discontinuing technical support and business services for those versions. Sunsetting older versions allows us to focus resources on enhancing our products and providing support for more current versions, resulting in a better experience for our customers. When a product is scheduled for sunset, Wasp Technologies will provide affected customers with advance notice, generally by means of this website. We update this website periodically, so please visit us again for more information as it becomes available. If you are currently using a sunset version of one of our products but want to continue receiving live technical support we strongly recommend that you purchase and register an updated version of that product. Terms, conditions, features, service options and pricing for support offerings and optional services are subject to change.
