### QuickStore - How to install the network edition.

Max Holden - 2017-04-10 - in [Software](#)

1. Install Quick Store on your system that will be the server.
2. Share out the WQS folder to your network. Contact your network administrator if you do not know how to share out a folder to the network.
3. On the workstation map the servers WQS folder as the S: drive. Contact your network administrator if you do not know how to map a network drive.
4. Open the mapped drive and run the file 'Set Up Workstation Access WQS.exe'. This will create a shortcut icon on the workstation's desktop and the proper initialization files on the server.

Once this is done you will need to call 866.547.9277 to register the server.
