## WaspTime 7: Import Samples folder is missing from installation disc

Scott Leonard - 2017-04-10 - in Software

### **Problem:**

In the WaspTime 7 Help documentation, the topics "Import - text files", "Import - Data from File", and "Import - .csv files" contain the statement "There are examples of the import format on your installation CD in the Samples folder."

However, this Samples folder is not on the installation disc.

### **Resolution:**

The Help documentation is incorrect. Instead, the WaspTime installer places the import templates on your hard drive in the installation folder. Default path:

64-bit Windows: C:\Program Files (x86)\Wasp Technologies\WaspTime

32-bit Windows: C:\Program Files\Wasp Technologies\WaspTime

Filenames are:

Import Template For Departments.csv

Import Template For Employees.csv

Import Template For Groups.csv
