### WaspTime & timeclock compatibility chart

Scott Leonard - 2019-08-21 - in [FAQs](#)

As a general rule, newer versions of WaspTime are programmed to recognize newer and older timeclocks. Older versions of WaspTime will not recognize newer clocks.

WaspTime works with Wasp-branded timeclocks as well as clocks from ESI. Timeclocks from any other manufacturer will not work with WaspTime.

Here's a compatibility chart:

WaspTime v7	1100 (W1100, Wx100) 2100 (W2100, Wx100) 3100 (W3100, Wx100) B1000 B1100 B2000 BC100 ESI clocks HD300 RF200
WaspTime v6, v5	1100 (W1100, Wx100) 2100 (W2100, Wx100) 3100 (W3100, Wx100) B1000 B1100 ESI clocks
ESI Timeline v5	ESI clocks
