WaspTime v5 or older: On some of the reports, time card summary report for example, I get an invalid page fault in module CRQE.DLL error. It then shuts Wasptime down

Max Holden - 2017-04-10 - in WaspTime v5 and older

You must be running at least Windows 98SE for the reports to run. Also, WaspTime is not supported on Windows 98. It is only supported on Windows 98 SE and higher
