WaspTime v5 & v6: If an absence is deleted from the timecard, then a different absence is applied to that day, the original absence code appears on the reports

Max Holden - 2023-01-20 - in Wasptime Version 6

Download the appropriate file for your version on the database server:

WaspTime v5: https://dl.waspbarcode.com/wasp/FixTimecardReportAbsenceCodesV5.zip

WaspTime v6: https://dl.waspbarcode.com/wasp/FixTimecardReportAbsenceCodesV6.zip
Extract it and run the .bat file to update the database. When you re-open WaspTime, the report should display the current absence code.

Please let us know if it does not.
